

1.1. The application contains several unnecessary and invisible tab-steps

Steps to recreate:

1. Login
2. Navigate to Tasks -> Manage Tasks -> Work Task
3. Select Work Task record item
4. Check the print version of the Work Task item

There are many interactive elements where the focus goes when tabbing is done. Unnecessary elements should be removed.

5. Print view of the work task form- Unnecessary elements are present as highlighted

6. Go to Home -> Unassigned Tasks(Asking for a single link instead of multiple links in the work task)

Home > My Team Unassigned Tasks

2 total found Apply Filters Clear Filters Show More Filters

Emergency	ID	RAG Color	RAG Colour	Task Name	Description	Request Class	Requested By	Requested For	Building	Floor	Work Location	Planned Start Date	Due Date	Assignment Status	Status	Assigned To
	1008329			Prepare the Meeting Room - Layout- Conference		Meeting Space Reservation	Sneha Kabane		Buddingeve 197	00 Ground Floor	S_03 Belgium	05/02/2019 10:15:00	05/02/2019 10:30:00	Unassigned	Active	
	1008330			Clean up the Meeting Room & Revert back to Layout- Conference		Meeting Space Reservation	Sneha Kabane		Buddingeve 197	00 Ground Floor	S_03 Belgium	05/02/2019 11:30:00	05/02/2019 11:45:00	Unassigned	Active	

In the table as well there are many links where the focus goes when tab is done.
 Note : Screen grab is captured from ISS System

7. Go to Tasks(If this is collapsed the screen reader won't be able to read the items below those)

If we press enter the menu is not being expanded.

Potential Solution:

- ➔ The tab should the visual presentation and – if it is contrary to the visual representation corresponding logical processing sequence
- ➔ Unnecessary and invisible Tabschritte should be avoided
- ➔ Elements that can not be use , should not be able to get the focus. To achieve this , should the tabindex – attribute of all non-interactive elements are removed
- ➔ Disabled items should not receive focus. Form elements should be disabled – Attributes are executed . It should be noted that due to a bug on Internet Explorer disabled – Attribute must be used without value assignment , In Links should href Attribute be removed
- ➔ In tables , only one entry per line should each be linked to bring up the task.
- ➔ The implementation of the navigation menu should be checked. Not currently visible links in the collapsed areas should also get no keyboard focus.
